

A. Notifier:

B. Patient Name:

Advance Beneficiary Notice of Non-coverage (ABN)

NOTE: If Medicare doesn't pay for D. _____ below, you may have to pay.

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the D below.

D.	E. Reason Medicare May Not Pay:	F. Estimated Cost
First Exam	NON-COVERED SERVICES	\$40.00
Therapy		\$5.00

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the D. _____ listed above.

Note: If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

G. OPTIONS: Check only one box. We cannot choose a box for you.

- OPTION 1.** I want the D. _____ listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but I can appeal to Medicare by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.
- OPTION 2.** I want the D. _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. I cannot appeal if Medicare is not billed.
- OPTION 3.** I don't want the D. _____ listed above. I understand with this choice I am **not** responsible for payment, and I cannot appeal to see if Medicare would pay.

H. Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-MEDICARE** (1-800-633-4227/TTY: 1-877-486-2048).

Signing below means that you have received and understand this notice. You also receive a copy.

Informed Consent to Chiropractic Treatment

The nature of chiropractic treatment: The doctor will use his/her hands or a mechanical device in order to move your joints. You may feel a "click" or "pop", such as the noise when a knuckle is "cracked", and you may feel movement of the joint. Various ancillary procedures, such as hot or cold packs, electric muscle stimulation, therapeutic ultrasound or dry hydrotherapy may also be used.

Possible Risks: As with any health care procedure, complications are possible following a chiropractic manipulation. Complications could include fractures of bone, muscular strain, ligamentous sprain, dislocations of joints, or injury to intervertebral discs, nerves or spinal cord. Cerebrovascular injury or stroke could occur upon severe injury to arteries of the neck. A minority of patients may notice stiffness or soreness after the first few days of treatment. The ancillary procedures could produce skin irritation, burns or minor complications.

Probability of risks occurring: The risks of complications due to chiropractic treatment have been described as "rare", about as often as complications are seen from the taking of a single aspirin tablet. The risk of cerebrovascular injury or stroke, has been estimated at one in one million to one in twenty million, and can be even further reduced by screening procedures. The probability of adverse reaction due to ancillary procedures is also considered "rare".

Other treatment options which could be considered may include the following:

- *Over-the-counter analgesics.* The risks of these medications include irritation to stomach, liver and kidneys, and other side effects in a significant number of cases.
- *Medical care,* typically anti-inflammatory drugs, tranquilizers, and analgesics. Risks of these drugs include a multitude of undesirable side effects and patient dependence in a significant number of cases.
- *Hospitalization* in conjunction with medical care adds risk of exposure to virulent communicable disease in a significant number of cases.
- *Surgery* in conjunction with medical care adds the risks of adverse reaction to anesthesia, as well as an extended convalescent period in a significant number of cases.

Risks of remaining untreated: Delay of treatment allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility, and induce chronic pain cycles. It is quite probable that delay of treatment will complicate the condition and make future rehabilitation more difficult.

Unusual risks: I have had the following unusual risks of my case explained to me.

I have read the explanation above of chiropractic treatment. I have had the opportunity to have any questions answered to my satisfaction. I have fully evaluated the risks and benefits of undergoing treatment. I have freely decided to undergo the recommended treatment, and hereby give my full consent to treatment.

Acupuncture Informed Consent to Treat

I hereby request and consent to the performance of acupuncture treatments and other procedures within the scope of the practice of acupuncture on me (or on the patient named below, for whom I am legally responsible) by the acupuncturist(s) who now or in the future treat me.

I understand that methods of treatment may include, but are not limited to, acupuncture, Chinese herbal medicine, and nutritional counseling. The herbs may have an unpleasant smell or taste. I will immediately notify a member of the clinical staff of any unanticipated or unpleasant effects associated with the consumption of the herbs.

I have been informed that acupuncture is a generally safe method of treatment, but that it may have some side effects, including bruising, numbness, or tingling near the needling sites that may last a few days, and dizziness or fainting. Unusual risks of acupuncture include spontaneous miscarriage, nerve damage, and organ puncture, including lung puncture (pneumothorax) Infection is another possible risk, although the clinic uses sterile disposable needles and maintains a clean and safe environment.

I understand that while this document describes the major risks of treatment, other side effects and risks may occur. The herbs and nutritional supplements (which are from plant, animal, and mineral sources) that have been recommended are traditionally considered safe in the practice of Chinese Medicine, although some may be toxic in large doses. I understand that some herbs may be inappropriate during pregnancy. Some possible side effects of taking herbs are nausea, gas, stomachache, vomiting, headache, diarrhea, rashes, hives, and tingling of the tongue. I will notify a clinical staff member who is caring for me I am or become pregnant.

I do not expect the clinical staff to be able to anticipate and explain all possible risks and complications of treatment, and I wish to rely on the clinical staff to exercise judgment during the course of treatment, which the clinical staff thinks at the time, based upon the facts then known, is in my best interest. I understand that results are not guaranteed.

I understand the clinical and administration staff may review my patient records and lab reports, but all my records will be kept confidential and will not be released without my written consent.

By voluntarily signing below, I show that I have read, or have had read to me, the above consent to treatment, have been told about the risks and benefits of acupuncture and other procedures, and have had an opportunity to ask questions. I intend this consent to cover the entire course of treatment for my present condition and for any future conditions(s) for which I seek treatment.

Kearney, MO 64060

Cupping therapy may be used and complements trigger point release. Suction cups are placed at various points over the muscles, creating a vacuum, which can pull up on the skin and increases circulation and pulls toxins to the surface.

Cupping naturally draws blood to the external capillaries of the body and as a result bruises may be left after treatment.

_____ Initials

I have read and understand that I may have some bruises or reddening of the skin after a cupping treatment.
